

# SUSTAINABLE OCEANS FOR ALL

Harnessing the benefits of the sustainable ocean economy for **developing countries**

A new DCD/STI/ENV project that brings together OECD's multidisciplinary expertise and unique statistical sources on the oceans to deliver:

- A **new report**, unpacking:

- The 2030 prospects of the ocean economy for selected developing countries;
- Effective policy frameworks and instruments for sustainable ocean economies;
- The role of development co-operation in supporting sustainable ocean economies

- The first set of **OECD multi-disciplinary country diagnostics** on the ocean economy for selected developing countries;

- A **new set of quantitative and qualitative indicators** and policy **recommendations** to guide policy makers;

- International **workshops** and launch event at the **2020 High Level Ocean Conference** to be hosted by Portugal.
